pc/MRP NEWS

pc/MRP RELEASES 8.80 VERSION

Oct 2013   e-mail address: sales@pcmrp.com   Internet: www.pcmrp.com

Option 100 Archive Manager

Option 100 allows users to archive data records and or recall archived data records. Requires pc/MRP Versions 8.71 or higher.

We recommend keeping your last 7 years of data active.

An Administrative Lockout (Configuration, User Connectivity and Administrative Lockout) must be set before running this option.

Currently archived on or before this date

Archive Manager added to version 8.71

In the event your database files become too large and pc/MRP's performance were to slow, pc/MRP Version 8.71 and higher allow database records to be archived and or recalled. It should be noted that the government requires keeping the last 7 years of records. The Archived data is stored in an Archives sub-directory. Data from related tables is automatically archived as well.
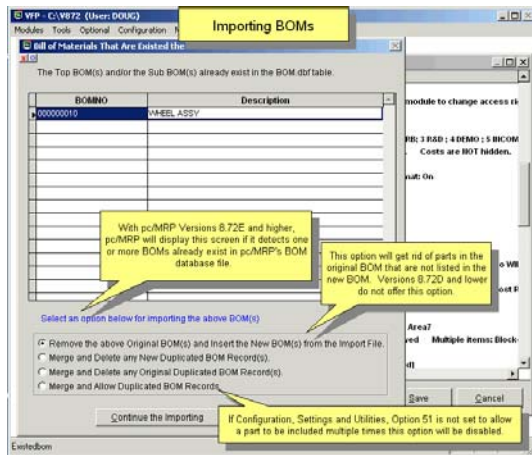

Ordering Information for Update

Companies who are currently on a support contract can update for **FREE**. Those not on a support contract can update to version 8.80 for $695.00. This includes 1 year of technical support (6-hour cap). To order the update call Software Arts 408-226-7321.
